---

## SUMMARY

---

Passionate and detail-oriented Frontend Developer with over 3 years of experience crafting web applications using JavaScript, React, Next.js, TypeScript, and Tailwind CSS. Skilled in building scalable, component-based architectures and managing complex UI state. I thrive in collaborative environments where questioning, proposing, and learning from feedback are part of the culture. Fast learner, proactive, and always ready to leave a meaningful impact on every product I work on.

## WORK EXPERIENCE

---

### Frontend developer - Hogarth

January 2022 - April 2025, Montevideo, Uruguay

- Developed 50+ responsive email templates for important client using HTML and CSS, ensuring total render accuracy across clients (Gmail, Outlook, Apple Mail).
- Built dynamic, SEO-optimized web pages using Vue.js and Next.js, enhancing site performance more than 90% (Lighthouse scores).
- Resolved cross-browser compatibility issues for email templates and web pages using creative problem-solving and attention to detail, ensuring a seamless user experience across platforms.
- Maintained high attention to detail and compliance with strict pharmaceutical industry regulations, ensuring all assets passed QA and legal review stages without delay.

## PROJECTS/OPEN-SOURCE

---

### HabiEvent

- Web App: React.js, Node.js, Express, PostgreSQL, Docker  
Mobile App: React Native, AsyncStorage, Custom Backend with Auth & JWT
- Habievent is a full-stack application for managing events and sending notifications. Built with a modern monorepo architecture, it leverages TypeScript across both frontend and backend for type safety and consistency.

### Destino Uruguay

- Web platform to explore cultural events, festivals, and tourist destinations across Uruguay.
- Using Nextjs, Typescript, cheerio, nodemailer
- Integrated a custom AI-powered chat using Chipp AI to assist users with real-time questions about events and destinations.
- Demo - <https://destinouruguay.vercel.app/>

### NeoBrutalismCSS

- lightweight and minimalist CSS library inspired by the principles of neo-brutalist web design. It provides a set of simple and modular CSS classes to help you create brutalist-style web pages with ease - 149 stars on Github
- Demo - <https://matifandy8.github.io/NeoBrutalismCSS/>

## EDUCATION

---

### Jóvenes a Programar, 2020 - Web Development Certificate

- Completed training in web development, focusing on HTML, CSS, and JavaScript.
- Enhanced English skills through Voxy platform and live classes with native speakers.
- Developed soft skills including teamwork, self-regulation, and determination.

Alkemy, 2021 - ReactJS Acceleration Program

Acceleration working on a project for a NGO such as frontend (React) with agile methodologies (scrum)

---
